

# ALL ABOUT APPS

*Friday  
July 1, 2016*

## STUDENT CHOICE

## CAM SCANNER

- Nancy
- A mobile scanner where you take a picture of a document with your device, and it will crop and enhance the document.
- You are able to Edit documents by putting on custom watermarks, add notes, and make annotations.
- CamScanner can even generate a PDF where you can search text and extract text
- Free and paid version.

## EVERNOTE

- Nancy
- Evernote is a note taking app that can sync across all of your devices.
- Organize your workflow by creating to-do lists, scan documents, collect and annotate images, and more.
- Evernote has become so popular, they are starting to charge to use the app, so the free features are limited.
- Reviews say that it is fantastic if you are willing to pay money, and a poor app for the free version.

## PODCASTS or DOWNCAST

- Verni, Norm and Bob
- Podcasts are essentially a magazine subscription, but in audio form.
- Podcasts are free.
- Subscribe to podcasts, and you will continue to receive new shows.

## 1PASSWORD

- Donna
- 1Password remembers all of your passwords and other sensitive information so you don't have to.
- Log in to websites without having to remember or type any of your passwords
- Sync your 1Password vault across mobile devices and computers.

# LET'S EXPLORE SOME APPS!

Thank you all for joining my class on "All About Apps." I hope more than anything that you leave this class more confident in using your iPhone or iPad. I appreciate all the feedback that you gave to me, especially for letting me know how much you enjoyed the class, and for some of the points I can improve on. If you have any more feedback for me, let me know. For those of you who will be in the following class on "Intermediate iOS" I look forward to seeing you again. For those who will not, don't hesitate to ask me any questions. Feel free to email me at any time, and I might be able to get a video made up for you, then send you a link to my YouTube page where it would be uploaded. Thanks for a great week everyone!
