WHAT WERE SOME OF THE APPS THAT YOU FOUND

?

ALL ABOUT iOS APPS

FAILURECONFETTI.SMAACKJEEVES.COM

THE NEXT FEW DAYS

- Today: iOS Apps
 - Phone, Messages, Safari, Clock, Weather
- Wednesday: Productivity
 - Google
- Thursday: Entertainment
 - Music, Movies, Books, Games
- Friday: Student Choice
 - Facebook?
 - What do you want to learn?

TUESDAYS LEARNING OBJECTIVES

- Students will be able to navigate and use the phone app to a higher potential.
- Students will be able to send text and picture messages, as well as understand the basics of how messages work.
- Student will be able to use Safari to search for pages and place them where they can be easily accessed.
- Given time, students will be able to use the Clock App.
- Students will be able to add and delete places on the Weather App.

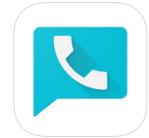

PHONE APP

- The Phone App is what you use to make phone calls. After all, you need to be able to make and receive calls on a phone, even if it is a smart phone.

- Alternative: Google Voice. (There are very limited options for apps that you can use to replace the phone app. Google Voice will still need to connect to Wi-Fi or use Data.)

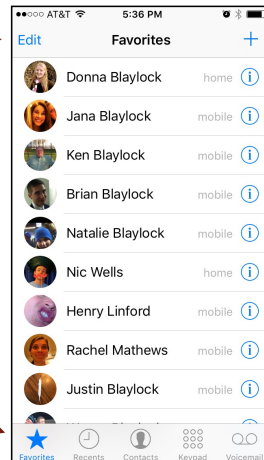

PHONE MENU

Menu

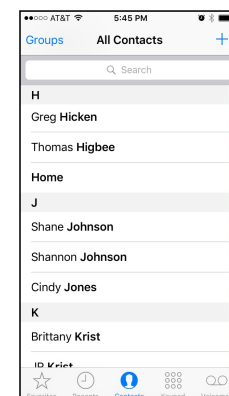

Navigation

CONTACTS

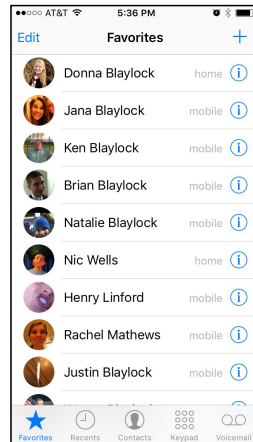

- Here you manage your contacts, and label what name, email, phone number, company, website etc belong with each other.
- Add a contact by pressing the + icon on the top right corner.
- Enter a first and last name, phone number and any other contact information you want to include. Include a picture of them too. Press "Done" to finish.
- Names are sorted alphabetically by last name.

FAVORITES

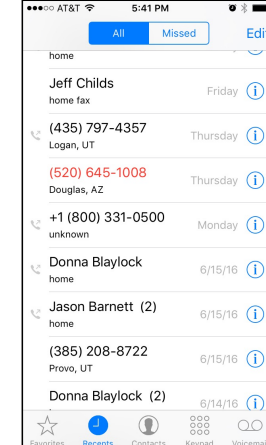

- Add people who you commonly contact to this panel so you don't have to go search for them for long.
- To Add, locate the individual in your contacts, scroll down until you see the option "Add to Favorites." Select the phone number that you want to add, and it is done.

RECENTS

- These are the recent calls that you have had, whether you called them, they called you, or you missed their call.
- If you called them, there will be this icon to the left: 
- If they called you, there won't be an icon.
- If it is a missed call, it will be red text.

MESSAGES

- Messages is iPhone's text messaging app. Text messages can be sent over Wi-Fi, Data, or a cellular network.

- Alternative: Facebook Messenger, Whatsapp. (These apps also rely on Wi-Fi and Data, and only go to those who have the same app).

COMPOSE MESSAGE

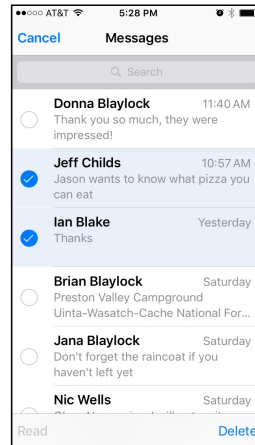

- Tap Compose Message,  then type in the name or phone number you wish to send a text message to.
- If you send a text to a landline phone, you will get an error message.
- If the name and conversation bubbles are blue, they are using iMessage. If they are green, they are using a cellular network to run it.

EDIT MESSAGES

- ▶ Tap the “Edit” option in the top Left Corner. You can now select any conversation on the left circle and delete those conversations.
- ▶ You Can also delete these by sliding the conversation to the left until you see “Delete.”

SAFARI

- ▶ Safari is Apple’s web browser. There is unlimited amounts of information that can be found on the internet.

- ▶ Alternative: Google Chrome, Atomic Browser, Dolphin Browser, Puffin Browser

NAVIGATION

Search Bar

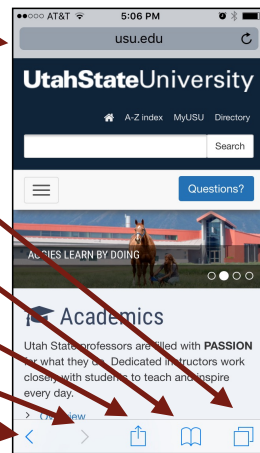

Tabs

Bookmark

Share

Forward

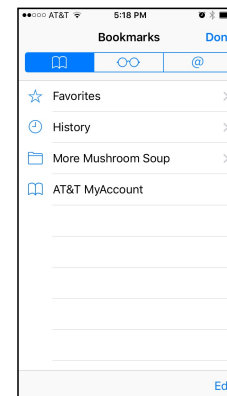

Back

BOOKMARKS

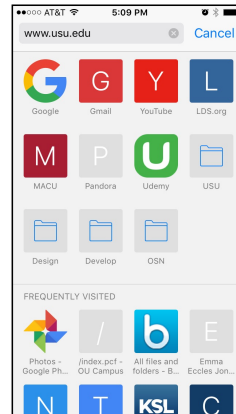

- ▶ Bookmarks holds all of your favorite sites (that you add through the “Shared” menu option), History, and any other custom bookmark you make.
- ▶ Reading List is something that you found that was interesting, but didn’t have time to read.
- ▶ Delete the bookmarks or reading list items by sliding the text box to the left until the “Delete” option appears.

BENEFITS OF SIGNING IN WITH iCloud

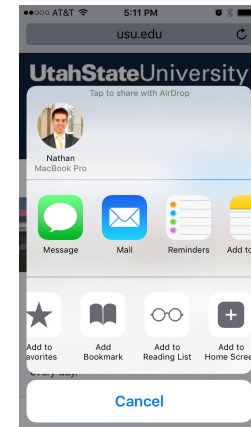

- When you tap the search bar to find a website, your iCloud can keep track of some of the most common websites that you use, and save bookmarks (see 2 slides ahead).

SHARE

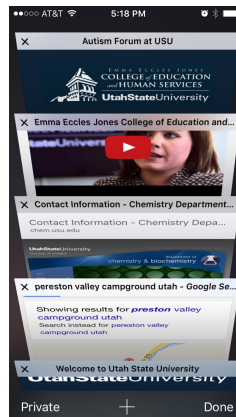

- Allows you to share a webpage that you think is pretty neat with other people, or yourself.
- Share with AirDrop (This will be talked about in Intermediate iOS), Mail, Messages, Reminders, etc.
- Add a website to Favorites, Bookmarks, Reading List, or create a shortcut app to your Home Screen.

TABS

- You can have multiple tabs open at once in the browser.
- It is important to keep this limited, since the more tabs open, the slower the device can become. Tap the x in the top left corner of each tab to delete them.
- Add a new tab with the + symbol.

CLOCK

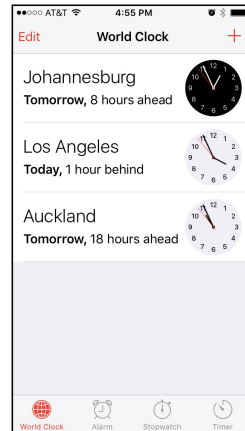

- Clock is an app that allows users to not only see time, but view time all over the world, set multiple alarms, start a timer, and stopwatch functions.
- Alternative: Wake Alarm Clock, Rise Alarm Clock, Stopwatch 7th

WORLD CLOCK

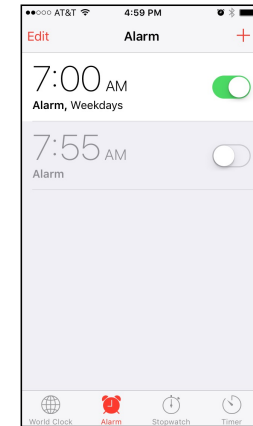

- Add a clock with the + icon on the top right corner of the iPhone.
- Choose the city most commonly connected to the time zone.
- If the clock is white, it is daytime, if black, then night time
- You can see what the time is relevant to your current location.

ALARM

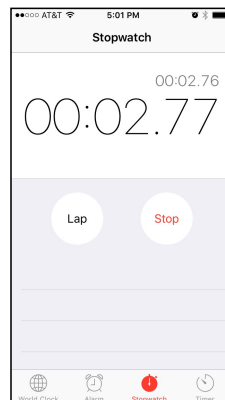

- To set a new alarm, tap the + icon in the top right hand corner.
- Adjust the time by sliding the hours, minutes, am/pm options.
- You can repeat alarms, edit labels, change the sound, and turn on the snooze option.
- You can't edit alarms once they are made. Just create a new one.
- Delete alarms by hitting "Edit" and tapping the red minus sign. (Or slide the alarm to the left until "Delete"

STOPWATCH

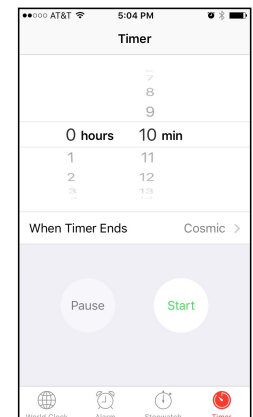

- Very simple options:
- Start, Stop, Lap, Reset.
- Start button turns to stop when pressed, and Reset changes to Lap while the stopwatch is running.
- Lap times show up underneath the buttons.

TIMER

- To start a new timer, Slide the options for hours and minutes until the time you want shows up. Press start and the timer will begin.
- You are given two buttons. One to start, and another to pause.
- While the timer is running, the start buttons turns to stop
- While the timer is paused, it changes to resume.
- Change the tune for the alarm under "When Timer Ends"

WEATHER

- The weather app will let you see weather at the current location, and anywhere around the world.

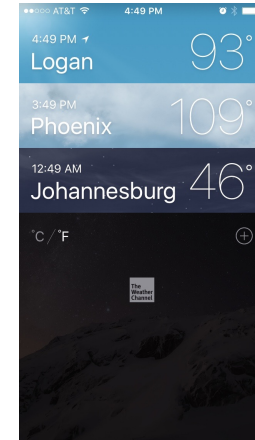

- Alternative: Yahoo Weather, The Weather Channel, Weather Underground.

ADD LOCATIONS

- Tap on the menu button (bottom right hand corner) and tap the + icon. Enter a Zip Code, name, or place and Apple will search for the place.
- Tap the name of the correct place to add it.
- To delete the location, tap the menu button, and slide the location to the left until you can see the “delete” option.

HANDS ON

INSTRUCTIONS

- **FIRST ACTIVITY:** Create a new contact and/or update a contact. If possible, share a contact with somebody nearby.
- **SECOND ACTIVITY:** Add a common website to an easily accessible place such as:
 - Reading List
 - Bookmark
 - Favorite
 - Add to Home Screen

“

Sometimes when you innovate, you make mistakes. It is best to admit them quickly, and get on with improving your other innovations.

—Steve Jobs
