WE ARE GOING TO TALK ABOUT AWESOME APPS

- Some of my favorites that you can get are
 - Weather
 - MyRadar
 - Adobe Acrobat
 - Pinterest
 - Kindle

WEATHER APP

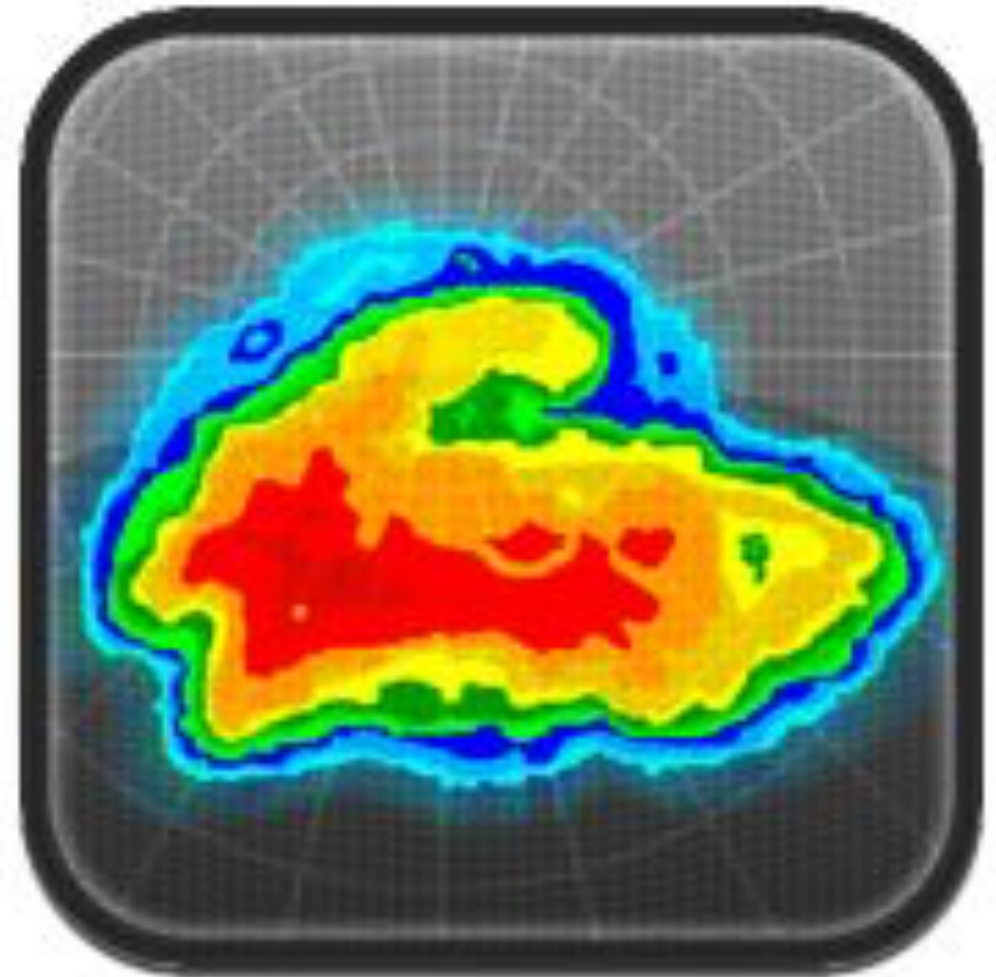

- ▶ Handy little app pre-installed on the iPhone.
- ▶ There is no pre-installed app on the iPad, but you can get a free one from the weather channel. This is loaded with adds.
- ▶ Add locations and see what the current temperature is and the forecast.

MY RADAR APP

- ▶ Great little app that extends what you can get from the weather app.
- ▶ This updates the temperature depending on where the crosshairs are, as well as shows where the storm is moving.
- ▶ Helpful to see where the rain will move.

ADOBE ACROBAT

- ▶ Great app to save a PDF from the internet.
- ▶ You can highlight, draw on, and save these to your iPhone or iPad.
- ▶ My favorite part of this app is that it has a built in scanner. Take a picture of a document, and it will create a PDF from the image that you can share with others.

PINTEREST

- ▶ Great app for browsing different projects.
- ▶ I personally enjoy this because I like to make things, and this gives me ideas.
- ▶ This is social media, but I just use it to find things, and not share them with others.

KINDLE APP

- ▶ Created by Amazon
- ▶ Read e-books on your device.
- ▶ You need to go to the amazon store, connect your device to your account, then either rent, or purchase books
- ▶ I like this for textbooks for class, because you can search the text for keywords, and multiple other features.
