## iOS

INTERMEDIATE iOS

*Thursday*
July 7, 2016

TODAY AND THE NEXT FEW

iOS

➤ Tuesday - iCloud, online and on the device, Backup, Keychain, Find iPhone.

➤ Wednesday (Yesterday) - Calendars, Mail, Notes, Reminders.

➤ Thursday (Today) - Camera, Photos, Maps

➤ Friday - AirDrop? AirPlay? Bluetooth? FaceTime. Health Apps.

  ➤ Send me an email at ngblaylock@gmail.com on what you are interested in learning, and we can go over it on Friday.
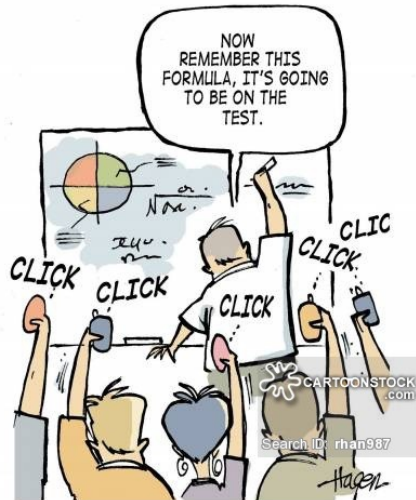

MAPS

iOS
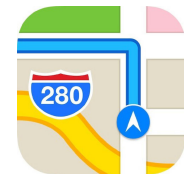

➤ Get help for traveling from one point to another.

➤ Get directions for both walking and driving.

➤ Start with a beginning location, and get directions to the end location. You can use your current location for the starting point.

➤ Search for locations for new areas such as landmarks, food, shopping, transport, and so on with suggestions.

CAMERA

➤ Take pictures with your iPhone or iPad when
you are in the moment, or if you want to
remember something for later.

➤ Back camera is 8 megapixels, and front is 1.2
megapixels (for iPhone 5S).

➤ Access your camera from the lock screen.
Just swipe up the app.

➤ Do most anything you would normally do
with a regular point and shoot camera.

➤ Use the volume buttons to take the picture.

PUT PHOTOS ON A MAC COMPUTER Apple iOS

➤ If you have Photo Stream turned on for your Apple computer, as well as your device, it should go on automatically.

➤ If not, simply plug in your device, and open the Photos app on the computer, and import your photos.

➤ Make sure the mac computer has permission to access your photos and videos.

➤ For more info, visit

http://www.idownloadblog.com/2015/02/12/how-to-transfer-photos-from-iphone-or-ipad-to-mac/

PUT PHOTOS ON A WINDOWS COMPUTER Apple iOS

➤ Putting photos on a windows computer can get a little tricky, since they compete with Apple, but it is possible to get them on there.

➤ There may be different ways to download the photos depending on if you run Windows 7, Windows 8, or Windows 10.

➤ For help, ask google or another search engine. Here is a good article that I found that may be useful:

http://www.macworld.co.uk/how-to/iphone/how-transfer-photos-from-iphone-pc-3634431/

HOMEWORK Apple iOS

1. **Read in the iPhone or iPad user guide on the Camera, Photos, and Maps.**

2. **Share a photo with a friend by email, messages, or any other way.**

Apple iOS

" You've got to start with the customer experience and work back toward the technology – not the other way around.

–Steve Jobs
